

hmap::Function

```
graph BT; A[hmap::DiskFunction] --> B[hmap::Function]
```

The diagram illustrates an inheritance relationship between two Haskell types. At the bottom is a gray rectangular box containing the text 'hmap::DiskFunction'. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text 'hmap::Function'. This visualizes 'hmap::DiskFunction' as a specialization or subclass of 'hmap::Function'.

hmap::DiskFunction
