

hmap::Vec3< int >

std::vector< float >

shape

vector

hmap::Tensor

```
graph BT; hmap_Tensor[hmap::Tensor] -.->|shape| hmap_Vec3[hmap::Vec3< int >]; hmap_Tensor -.->|vector| std_vector[std::vector< float >];
```

The diagram illustrates the relationship between the `hmap::Tensor` type and its derived types. At the bottom, a grey box labeled `hmap::Tensor` has two dashed purple arrows pointing upwards. The left arrow, labeled `shape`, points to a white box labeled `hmap::Vec3< int >`. The right arrow, labeled `vector`, points to a white box labeled `std::vector< float >`.
